American Woodcock		■	■	■	■	■	■	■	■	■	■	■	■
Wilson's Phalarope				■	■	■	■	■	■	■	■	■	■
Red-necked Phalarope (Rare)						■			■	■	■	■	■

* Status and Dates based upon the fourth edition of the *OSS Date Guide to the Occurrences of Birds in NE Oklahoma* modified by my personal experience from NE Oklahoma

- Rare Occurs in very low numbers each year with the possibility of none seen in some years.
- Occasional Occurs sporadically in very low numbers or occurs sporadically during the winter.
- Uncommon Occurs in low numbers and may not be seen on every trip but may occur sporadically in large numbers.
- Common Occurs in good numbers during the periods indicated.

- a. - These species usually found with greater frequency and in greater numbers on shorelines and mudflats of lakes than sod farms.
- b. - This species usually found with greater frequency and in greater numbers on sod farms and plowed fields than on shorelines and mudflats of lakes.
- c. - These species are occasionally found in large numbers during their prime migration period even though they are listed as rare or uncommon.
